

Handoff: Oct 4, 2026 Session

For: the next Claude session (ideally a **Claude Desktop** session on Carissa's computer, with Claude in Chrome or the built-in browser turned on and Instagram logged in). **Repo:**

github.com/FarmhouseGetaways/instagramvideo · branch `claude/fervent-goodall-yhv3p0` . Read `CLAUDE.md` first. It holds all standing rules.

1. What got done tonight

Website fix: boulderoakdiscgolf.com (LIVE)

- The **"Stay at Mountain Retreat"** pill at the top of the page used to open the booking form (`#book`). It now opens <https://farmhousegetaways.com/mountain-retreat>, so disc golf visitors see what Mountain Retreat is first.
- Repo `FarmhouseGetaways/boulderoakdiscgolf` , commit `85b0ca9` on `main` . Netlify deployed it, and it was checked on the live site.
- **Left as is (Carissa's choice):** the "Check dates" button in the "Play it where you stay" section still goes to `#book` . The "See Mountain Retreat" button sits right next to it.

Mountain Retreat carousel (built, NOT yet posted)

- 10 images Carissa picked from her "HDR MR" folder, in her upload order. The full-resolution originals were used.
- 4:5 portrait (1080×1350), house "crisp HDR look" grade, hook on **slide 1 only**: "Sleeps 14. Eight acres. Disc golf and a pub-style arcade."
- Slide order: 1 aerial at dusk · 2 basket under string lights · 3 golden-hour basket under oak · 4 wooden bridge and stone path · 5 basket below granite hilltop · 6 basket with bridge · 7 blacklight arcade · 8 lit bridge at night · 9 game room lounge · 10 arcade garage.
- Post kit (caption, hashtags, other hooks, tips): `accounts/farmhousegetaways/projects/2026-10-04-mr-carousel/notes.md` (PDF: `pdf/FG_MR-Carousel_Post-Kit_2026-10-04.pdf`).
- **The slide images aren't in git** (media rule). They're in the chat. Carissa saves them to `Downloads/MR-carousel/slide_01.jpg ... slide_10.jpg` .

Mountain Retreat video (Reel + Story, NOT yet posted)

- 17s, silent so music can be added in-app. Hook: "This getaway comes with its own disc golf course".
- Flow: aerial → disc golf in golden hour → string lights → lit bridge → arcade → game room. End card: "Mountain Retreat · Ramona, CA · Sleeps 14". Wide photos pan across the vertical frame.
- Plans: `.../2026-10-04-mr-carousel/plan_reel.json` , `plan_story.json` (sent in chat as `_share.mp4`).

Tools added tonight

- `scripts/make_carousel.py` : carousel slides (4:5 crop with focus point, grade, slide-1 hook).
 - `scripts/make_reel.py` : photos can now pan (`"motion": "pan_lr" / "pan_rl"`).
-

2. New rules from tonight (already in CLAUDE.md)

1. **"Finished" = built inside Instagram up to the Share button, then ask Carissa.** Never post without her yes.
 2. **No more Google Drive for handing over files.** Carissa uploads straight into the chat (5 at a time). The Drive connector can't see stars and caps files at 10 MB.
 3. Mountain Retreat facts are confirmed from boulderoakdiscgolf.com (see FG `brand.md`). The HDR images are AI-enhanced real photos. **Turn on Instagram's AI info label** when posting them.
-

3. Next steps (in order)

1. **Build the carousel in Instagram** on @farmhousegetaways: upload slides 1–10 in order (don't re-crop), paste the caption from the post kit, add a calm warm instrumental, turn on the AI label. **Stop at Share and ask Carissa.**
 2. Then the same for the **Reel** (and Story), if she wants them posted.
 3. **Open question for Carissa:** the hot tub and fire pit show in slide 1. Add them to the caption?
-

4. Still waiting on Carissa (from earlier sessions)

- **Voice clone:** 60–90s voice memo (guide: `docs/voice-clone-recording-guide.md`) and the list of words to pronounce a certain way (`accounts/pronunciations.md`). Chatterbox is set up. The voice sample goes in Drive folder `Claude Instagram Studio/Voice Sample (private)` .
 - **Proof-of-concept review (Sept 27):** OK to post the child on the swing? Is the woman with coffee Carissa? Do the "market mornings / come early" lines and the FFF narration lines fit?
 - **Business or Creator** for each account (decides which music is available).
-

5. Paste this into the Desktop session to start

```
Build an Instagram carousel on @farmhousegetaways in my logged-in browser.
Follow the rules in github.com/FarmhouseGetaways/instagramvideo (CLAUDE.md and docs/handoff-
2026-10-04.md),
branch claude/fervent-goodall-yhv3p0.
Slides: Downloads/MR carousel/slide_01.jpg ... slide_10.jpg, in that order, already 1080x1350,
don't re-crop.
Caption and hashtags: accounts/farmhousegetaways/projects/2026-10-04-mr-carousel/notes.md
```

("Caption" section).

Add a calm, warm instrumental from Instagram's music, and turn on the AI info label.
Stop at the Share button and ask me before posting. Never post without my yes.
